

Prof. (Dr.) Manash Ranjan Sahoo
Vice Chancellor,
Odisha University of Health Sciences(OUHS) , Bhubaneswar

Odisha University of Health Sciences(OUHS) was established with a goal & vision to take care of the quality medical education in institutions of medical/dental & allied health sciences of our state.

It's an honor & privilege to take over the charges of Vice Chancellor on 15th May 2024 after serving for more than 27 years in two premier medical institutions of our state SCB Medical College, Cuttack as Associate Professor in Surgery & All India Institute of Medical Sciences, Bhubaneswar as Professor & Head, Dept of Surgery. All these 27 years of my journey in two top notch medical institutions of our state, I had the honor & privilege of leading many national & international surgical & laparoscopic surgical associations & prominent laparoscopic surgical journals of Asia pacific region in their decision making bodies catering to academics, research & patient care My long journey in the field of laparoscopic surgery in creating an image for our state in the national & international surgical map will surely help me create a new space & dimension for holistic growth & development of our medical/dental and all allied institutions of our state and their faculties & students and being a surgeon and a dedicated laparoscopic surgeon I strongly believe in the principle of team work and 'team' stands for together every one achieves more. My vision is to establish and develop all our affiliated Medical/Dental allied health institutions as a Centre of Excellence in medical/dental and allied health services taking note of the advances happening in 21st century.

My goal is not only to focus on comprehensive & overall development of OUHS but also to see all affiliated institutions under its umbrella excel in the field of academics/research & patient care.

I strongly believe unless we improve patient care services academics & research will not improve so will take steps in creating the appropriate platform for all affiliated institutions to progress in this direction.

I urge the faculties & students of all affiliated medical/dental and allied health sciences to join hands with the university & me in particular to reach our desired goal.

Warm Regards

Manash
